

INVISIBLE WINDSHIELD PROTECTION FILM®

Manufactured by Madico

The Choice Is Clear For Your Customer

Like most automobile dealers, you already have a wide variety of “aftermarket” products. And because of this, it becomes important to add aftermarket products that tie in with what you already sell.

If you currently sell **paint protection films** and/or **window tinting**, then the **ClearPlex Invisible Windshield Protection Film®** is a natural and easy addition to your current line of aftermarket products. Selling ClearPlex Invisible Windshield Protection Film® will not take any more of your customers’ valuable time than what is already spent on these two popular aftermarket products. Best of all, the ClearPlex film can be very profitable for your efforts.

ClearPlex is optically clear and guaranteed not to peel, bubble, crack or yellow for the warranted life of the product. Being transparent, ClearPlex only minimally reduces the visible light transmittance through the windshield.

Now There Is Protection For The Windshield

Customers’ desire to protect their auto investment is seen in the increasing popularity of paint protection films. Rock chips on the paint of a car is an annoyance. Cracks and chips in the windshield can be expensive and hazardous.

With ClearPlex, there is now protection for the Windshield. ClearPlex is the first and only optically-clear protection film for auto windshields. This patent-pending product absorbs the impact of standard road hazards – significantly reducing the occurrence of rock chips, pitting and bull’s-eyes – leaving the glass in pristine condition.

ClearPlex is designed to take what the road dishes out. Impacts which shatter unprotected glass leave only a minimal pin-point on the film, preserving its optical clarity. Like glass, ClearPlex is scratch-resistant and stands up to everyday abrasions, such as windshield wipers.

Thermally Fitted To The Windshield

Depending upon the windshield, installing ClearPlex can take less than half an hour by a certified installer. The film is thermally fitted to every curve of the windshield, forming a bond with the glass and ensuring that the ClearPlex is optically clear.

Questions and Answers

Invisible Windshield Protection Films®

What is ClearPlex Invisible Windshield Protection Film®?

ClearPlex is a patent-pending film applied to the exterior surface of a windshield, preventing damage from ordinary highway rock strikes and road debris. ClearPlex is virtually invisible, providing optical clarity and UV protection.

Why should customers install ClearPlex?

ClearPlex provides three main benefits:

- Impact resistance against normal road hazards
- UV stabilizers which reduce vehicle heat, prolonging interior life
- Faster run-off of rain, snow and other elements, providing better visibility

Will ClearPlex impair the driver's vision?

No. ClearPlex is optically clear and guaranteed not to peel, bubble, crack or yellow for the warranted life of the product. When installed properly, ClearPlex is virtually invisible.

Is ClearPlex scratch resistant?

Yes. Our hard-coated film features much the same scratch resistant qualities as glass and will protect against normal abrasion – including windshield wipers.

Will ClearPlex remain adhered to the windshield?

The adhesive is strong enough that high-power car wash streams do not cause the film to lift from the windshield.

Is ClearPlex permanent?

No. ClearPlex is a film that protects the windshield from harsh conditions that often break or chip standard windshields. Being a film, ClearPlex should occasionally be removed and replaced to provide the best protection for the windshield. The need and timing to replace the film is dependent upon the miles driven and the conditions in which those miles are accumulated.

How is ClearPlex removed or replaced?

ClearPlex uses a unique adhesive that keeps the film adhered tightly to the windshield, but at the same time the adhesive is not permanent. If the Invisible Windshield Protection Film® needs to be removed for any reason, it can be removed by using a semi-sharp instrument, such as a knife blade, key, etc., to lift up one corner of the film. Then, by pulling the film with constant pressure, the film will come off of the windshield. Any adhesive remaining on the windshield is removed with a basic soap and water washing of the windshield. New ClearPlex can then be installed on the clean windshield.

Does ClearPlex offer a warranty?

Yes. ClearPlex Corporation offers a one-year or 12,000 mile limited warranty on all ClearPlex products. Details of the warranty are found in the warranty document.
